

JOAN MARIE SUMAMPONG

BUSINESS ANALYST | FULL-STACK DEVELOPER

OBJECTIVE

I help businesses run smoother through practical digital solutions. Skilled in understanding complex workflows, identifying bottlenecks, and creating user-friendly systems that solve real problems. Combines analytical thinking with technical development skills across multiple roles.

RECENT PROJECTS

TriGroup

2025

- Savings and loan management system for private associations with member contributions and interest-based lending

V-Fire Inspect

2025

- Establishments Fire inspection management system for Bureau of Fire Protection (BFP) with geo-tagged records and real-time mapping.

SackTrack

2025

- Rice wholesale management system with inventory tracking and sales analytics.

WORK EXPERIENCE

Business Analyst Intern

JUNE - OCTOBER 2025

- Performed four distinct roles across multi-client system projects: Business Analyst, QA Tester, UI/UX Designer, and Developer—supporting Accounting, HRIS, ERP, and education-related systems.
- Analyzed and documented business workflows for HRIS, accounting systems
- Drafted user manuals, turnover documents, and training materials for client onboarding
- Performed QA, regression, and UAT testing on systems with complete documentation
- Designed and iterated prototypes for ERP customized systems
- Coordinated with developers and clients for issue verification and resolution

Freelance Web-App Developer

2024 - PRESENT

- Built websites and web apps for clients from start to finish, including talking with clients, designing screens, and coding everything.
 - Built custom websites using React, TypeScript, and modern tools
 - Talked with clients to understand what they need and want
 - Designed user-friendly screens and layouts using Figma
 - Managed complete projects from idea to launch and updates

EDUCATION

Bachelor of Science in Information Technology

2022-PRESENT

- Currently pursuing degree
